Prefinished Beams & Mantels

- Authentic Designs & Colors
- Easy DIY Install
- 5-Year Prefinish Warranty

Designed to replicate the look and texture of real timber beams, Fypon Polyurethane Beams are an easy upgrade to any home.

Prefinished beams are ready for installation, simply cut to length and install.

English Walnut	Medium Oak	Antique Oak	Walnut

Smooth beams are also available to be prefinished.
See the EL & EL Prefinish trifold for available colors.

Note: Although all images displayed were shot under the same lighting conditions, they are for preview purposes only. Actual results may vary in grain, color, and shade.

Cutting, Milling & Installing

Fypon polyurethane products can be cut, trimmed, drilled, nailed, and glued with standard woodworking tools.

Note: All trimmed edges must be patched with standard wood filler and finished with paint or stained to protect the exposed polyurethane from discoloration from the sun.

Adhesive

A urethane-based adhesive such as **Loctite® PL Premium Construction Adhesive** is recommended on all joints when installing Fypon products.

For additional information, visit **Fypon.com**.

Fire Rating

Requirements for fire resistant building materials **do not apply to most Fypon polyurethane products**. Please consult your local building code authority to determine actual building requirements in your area.
